

WI DNR State-Funded Response Program Current Contracts by County

The following chart lists 73 projects currently proceeding under contract funded by the Environmental Fund (EF), or those projects proposed to proceed but that have been delayed due to the Fiscal Year 2003 (FY '03) budget repair bill.

The WI Department of Natural Resources contracts for investigation and cleanup of contaminated land using the EF. Some investigations and cleanups are funded this way because no one is known to be responsible for the contamination, or the responsible party is unable or unwilling to finance a cleanup. In addition to these projects, DNR completes numerous other small investigations using the EF to find out who is responsible for cleaning up contamination – for example, sampling to determine if wells are being contaminated by an abandoned landfill.

Often a full investigation and cleanup project can last several years and involve multiple contracts. Some of these contracts use funds that were encumbered (i.e. set aside) in previous years. The dollar amount listed below is the total amount encumbered for that contract – the funds remaining in each of the contracts may be less than the figure listed below because some contract work has already been completed. Also, there may be other contracts (previously completed or needed in the future) and additional funds for each project listed that do not appear in this chart.

The status of these projects is uncertain due to budget deliberations between the governor and the State Legislature for FY 2003-2005. Once the budget is finalized, the Department will need to determine the distribution of any reductions. Contracts will continue where DNR is legally obligated – for example, where the state is responsible for funding its share of Superfund cleanups.

City	Site Name	County
Brief Summary of Site		Total Contract Amount (\$)
City of Ashland	NSP/Superfund Site	Ashland County
Coal gas contamination in Chequamegon Bay and along the shoreline. State is doing preparation work for the site to be remediated under Superfund and has already spent over \$1 million in previous work here.		\$260,834
City of Ashland	Kreher Park	Ashland County
Investigation to determine if this site is linked to previously identified contamination at site.		\$65,250
City of Green Bay	H & R Landfill (Finger Road)	Brown County
Operations and maintenance of gas monitoring system. Methane gas migration to nearby off-site homes poses an ongoing safety hazard.		\$77,200
City of De Pere	Better Brite De Pere	Brown County
The site is in long-term operations and maintenance phase.		\$20,000 EPA = \$18,000 WDNR = \$2,000
City of Green Bay	Fox River Superfund	Brown County
Contract to complete the Superfund RI/FS and Record of Decision.		\$375,000

City of Green Bay	Fox River Superfund	Brown County
Sediment sampling contract.		\$104,800
City of Green Bay	Fox River Superfund	Brown County
Change order for detailed evaluation of remedial alternatives.		\$1,325,329
Village of Siren	Pentawood RA	Burnett County
WDNR has a State Superfund Contract on this EPA lead Superfund remedial action. Contaminants in adjacent groundwater and surface waters include PCP, fuel oil, and heavy metals.		\$12,753,552 EPA = \$11,469,197 WDNR = \$1,274,355
City of Chilton	Chilton Municipal Well #5	Calumet County
Gather information to identify the source of the contamination, determine degree and extent of soil and groundwater contamination, and recommend a clean up action.		\$197,945
City of Bloomer	Rihn Oil Bulk Plant	Chippewa County
Operations and maintenance of Soil Vapor Extraction System. Enforcement standards for GRO and PVOC's are still being exceeded in the groundwater.		\$6,500
City of Neillsville	Neillsville Foundry	Clark County
Foundry operators historically disposed of waste from the manufacture of iron castings on site. This project is to evaluate existing site data, collect additional groundwater and soil samples at the foundry and prepare a Remedial Action Options Analysis in order for the DNR to approve a final action and complete all necessary remedial action.		\$47,603
City of Portage	Glacier Oil	Columbia County
Investigation of groundwater and soil contamination at former gas station site. Contract for construction of additional wells to do additional testing.		\$71,000
Town of Doylestown	Ken LaGrange/Doylestown	Columbia County
Soil remediation at former battery cracker/ storage site. Lead-impacted soil and building materials had to be removed from the site and properly disposed of.		\$64,990
City of Middleton	Refuse Hideaway	Dane County
WDNR has several contracts to conduct various ongoing monitoring and operation and maintenance activities at this Superfund site.		\$100,000
City of Fitchburg	Rimrock Road	Dane County
Investigation to discover source and extent of PCE contamination in local potable wells.		\$127,300
City of Madison	Madison Municipal Well #3	Dane County
Investigation to discover the source of various contaminants entering the municipal water supply.		\$440,000
Town of Middleton	Watts/Seybold Road	Dane County
Site investigation to determine degree and extent of VOC contamination in an 80 acre area.		\$167,554
Town of Madison	Town of Madison	Dane County
Investigation to discover the source of TCE and PCE contamination found in monitoring wells in Fish Hatchery Road area.		\$90,000

City of Stoughton	Stoughton Landfill	Dane County
WDNR has contracts to conduct ongoing monitoring and operation and maintenance activities at this Superfund site.		\$32,800
City of McFarland	Terminal Drive Site Investigation	Dane County
Investigation to determine source of groundwater contaminated with a light gasoline-type petroleum.		\$67,120
Town of Ashippun	Oconomowoc Electroplating	Dodge County
Investigation of contaminated soils and groundwater near this site following the Superfund remedial action completed in 1995.		\$290,000 EPA = \$261,000 WDNR = \$29,000
City of Superior	Newton Creek	Douglas County
Site Investigation/Remedial Alternatives Analysis/Design for interim action for the contamination associated in the study area surrounding Newton Creek.		\$439,970 (\$88,471 of this amount was shifted to bonding)
Town of Lamartine	Otto Steidaman Property	Fond du Lac County
Site investigation, demolition and restoration of former salvage yard.		\$80,000
City of Fond du Lac	Quicfrez	Fond du Lac County
Remedial action to remove TCE compounds on former manufacturing and storage facility located in a residential neighborhood.		\$1,045,000
Town of Mt. Calvary	Abhold's Garage	Fond du Lac County
3 rd annual renewal of operations and maintenance contract for groundwater treatment and soil vapor extraction of VOC's.		\$14,000
City of Ellenboro	Ellenboro Store UST	Grant County
Contract for groundwater treatment design for petroleum contamination.		\$25,000
City of Kenosha	Frost Manufacturing	Kenosha County
Site investigation, demolition and clean up of former hazardous waste facility.		\$1,500,000
Town of Pierce	Kewaunee Marsh	Kewaunee County
Site investigation of the old arsenic spill site.		\$61,000
Town of Onalaska	Onalaska Landfill	La Crosse County
Conduct semiannual groundwater sampling/reporting and ongoing operation and maintenance at this Superfund site.		\$115,000 EPA = \$57,500 WDNR = \$57,500
Town of Onalaska	National Auto Wrecking Salvage	La Crosse County
Groundwater investigation using in-place monitoring system. EPA performed remediation activities at the site in 2001.		\$38,700
City of La Crosse	La Crosse Municipal Wells	La Crosse County
Investigation to identify source(s) of PCE contamination in city water supply wells.		\$110,000
City of Antigo	Langlade Oil Company (former)	Langlade County
Assess the potential environmental impacts and define the extent of contamination. Environmental concerns at the site are the presence of petroleum contamination at the surface and at depth, groundwater contamination, and documented seepage of petroleum product to Spring Brook		\$20,574

Manitowoc/Two Rivers	Manitowoc/Two Rivers TCE Investigation	Manitowoc County
Area-wide investigation of sites contaminated by TCE to determine if there is a regional source. Seeking to identify responsibly parties so that investigations an clean up do not need to be funded with state moneys.		\$20,000
Village of Hustler	Hustler Hardware	Marathon County
Investigation of petroleum contamination in groundwater and potable water supplies, some proximity to a municipal water supply.		\$40,200
City of Abbotsford	Abbotsford Private Wells	Marathon County
Soil gas survey for PCE contamination		\$6,900
Town of Elderon	Town of Elderon	Marathon County
Investigation of VOC contamination in local potable wells.		\$90,480
City of Marathon	Weisenberger Tie & Lumber	Marathon County
Continuation of groundwater operations and maintenance.		\$74,020
Unity	Unity Auto Investigation	Marathon County
Initial investigation of petroleum and dry cleaner contamination impacting groundwater.		\$40,000
Wausaukee	Wausaukee Test Well at Evergreen Park Investigation	Marinette County
Initial investigation of contamination at site of a proposed municipal well.		\$40,000
Montello	Montello Landfill Sampling	Marquette County
Sampling at closed landfill to determine if private water supplies are being contaminated.		\$8,900
City of Milwaukee	3033 W. Walnut Street	Milwaukee County
Site remediation is complete and we are awaiting final reports and invoices.		\$625,000
West Milwaukee	Mobile Blasting Off Site Investigation	Milwaukee County
Initial investigation of a large area of petroleum contamination in West Milwaukee. This investigation seeks to identify a responsible party who would then proceed with a multi-million dollar clean up project.		\$50,000
City of Milwaukee	Moss American	Milwaukee County
Contracting for modeling and environmental experts to assist in reviewing a remediation proposal involving relocation of a riverbed.		\$16,960
Tomah	Tomah Well #8 Investigation	Monroe County
Initial investigation of municipal well contamination.		\$40,000
City of Tomah	Wittig Oil	Monroe County
Investigation of petroleum contamination at site.		\$76,755
Town of Lakewood	Lakewood/Pelkey DX	Oconto County
Investigation of TCE and BTEX contamination in Chain Lake and nearby potable wells adjacent to former Pelkey DX gas station.		\$167,700
City of Rhinelander	Rhinelander Landfill	Oneida County
Modeling of landfill to determine the effectiveness of current city efforts to reduce toxic discharge to Slaughterhouse Creek.		\$115,500

City of Rhinelander	Lincoln Street PCE	Oneida County
Site Investigation to identify the source(s) of chlorinated solvent (PCE/TCE) contamination observed in groundwater in the Lincoln Street area.		\$89,072
City of Kaukauna	Wisconsin Chrome	Outagamie County
Groundwater treatment		\$101,451
City of Appleton	N.W. Mauthe	Outagamie County
Groundwater operations and maintenance.		\$80,679
City of Appleton	Midwest Plating	Outagamie County
Contract for sampling, design and oversight to implement an interim action on private residential properties that were contaminated by an adjacent metal plating facility.		\$66,152 investigation \$200,000 clean up
City of Appleton	Midwest Plating	Outagamie County
Construction contract for soil removal and restoration at residences adjacent to site.		\$65,201
City of Amery	Thompson Machine	Polk County
Site investigation to determine origins of chlorinated compounds entering the Apple River.		\$111,400
Town of Milton	Rock Paint & Chemical	Rock County
Groundwater remediation. We continue to pump and treat groundwater at this site.		\$40,388
City of Janesville	Riverside Plating	Rock County
Site formerly remediated under a state contract in 1997. Site is currently monitored by a consultant. Potential for contamination to migrate to the Rock River.		\$16,460
Town of Beloit	Dwyer Property	Rock County
Shutdown of drinking water treatment system for successfully remediated site.		\$41,000
City of Edgerton	Edgerton Sand & Gravel	Rock County
TCE contamination near the Rock River. Plume is being remediated to reduce threats to the river and nearby potable wells.		\$54,950
Town of Hayward	Price Rite	Sawyer County
Petroleum contamination near Namekagon River. Plume is being remediated to avoid threats to the river and nearby potable wells.		\$130,000 (estimate for 2 years of operation)
Town of Warren	Town of Warren	St. Croix County
Investigation of groundwater sampling of newly constructed homes that indicated very high trichlorethylene (TCE) concentrations.		\$219,028
City of Medford	Scrap Processing	Taylor County
WDNR has a State Superfund Contract with EPA on this EPA lead Superfund site. Site is now in operation and maintenance phase.		\$1,833,300 EPA = \$1,649,970 WDNR = \$183,330
City of Westby	Westby Dry Cleaners	Vernon County
Investigation of contamination at Westby Dry Cleaners site with groundwater sampling indicating perchloroethylene (PCE) concentrations.		\$33,842

Westby	Westby Dry Cleaners Soil Sampling	Vernon County
Follow up investigation at dry cleaner site where clean up of groundwater is underway. Soil contamination should be dealt with simultaneously for most cost-effective remedies.		\$10,000
Town of Elkhorn	Getzen Musical Instruments	Walworth County
Site investigation. Site has undergone EPA soils removal action.		\$275,000 investigation \$1,500,000 clean up
Town of Springbrook	Springbrook Investigation	Washburn County
Construction and oversight for the installation of a Soil Vapor / Air Sparging system to reduce the concentrations of pollution found at the site.		\$183,342
City of Waukesha	Barrett Landfill	Waukesha County
Operations and maintenance of leachate system. State capped abandoned landfill in 2000. Leachate system needs constant monitoring.		\$29,700 (2 years)
Waukesha	West Avenue Landfill	Waukesha County
Pilot project as incentive to enter into negotiated agreements under section 292.35 to clean up landfills.		\$1,500,000
Delafield	Delafield Sanitary Landfill and Transfer	Waukesha County
This was a privately owned landfill where an interim remedy has been in place for 10 years, involving perimeter gas extraction system. The landfill needs to be capped to prevent leaching of contaminants into groundwater with an adverse effect on water supplies.		\$3,000,000
City of Neenah	Shilobrit's Dry Cleaners	Winnebago County
Investigation of PCE found in groundwater adjacent to the dry cleaners.		\$56,500
City of Menasha	American Quality Fibers	Winnebago County
Gather information to identify the source(s) and to determine the degree and extent of soil and groundwater contamination and recommend a clean up action(s) that will restore the environment and protect human health.		\$83,312
Village of Waukau	Panzen Transfer	Winnebago County
Investigation to determine extent of soil and groundwater contamination of petroleum.		\$18,488
City of Oshkosh	Shilobrit's Dry Cleaners	Winnebago County
Investigation of PCE found in groundwater adjacent to the dry cleaners.		
City of Pittsville	Pittsville Well Investigation	Wood County
Site Investigation – gather information to identify the source of the contamination at the municipal well, determine the degree and extent of soil and groundwater contamination, and recommend a clean up action.		\$166,331
Statewide	Natural Attenuation Study	Statewide
Pilot study to affirm success of natural attenuation as a remedy at petroleum and chlorinated solvent sites. This is match for significant federal funding which will be lost if funds are not available.		\$25,000
